### Stapling device CO/3 A 20 - 60 Stapling Slide lids into cardboard tubes

For full automatic fastening of slide lids into cardboard or plastic tubes of different heights.

Insert covers are stapled fully automatically in cardboard drums with different heights. The cardboard drum with the attached cover will be fed on a roller conveyor into the stapling station.

The stapling unit with its 3 stapling heads is lowered to the drum height and 3 staples are positioned simultaneously to consolidate the insert cover with the cardboard drum.

The stapling operation accomplished the stapling unit goes up again and the next cardboard drum can be fed into the stapling station.

Equipped with  
**3 stapling heads A 20 - 60**  
Stapling heads 1 left and 2 right execution.
